

Custom Food Trucks Built in Mississauga

<http://www.silverstarmetal.com>

Owning a food truck has become one of the most lucrative businesses in North America. The business is essentially a restaurant on wheels. The food truck goes where the hungry customers are. The overhead on a food truck is low compared to a brick-and-mortar restaurant which requires a building and expensive staff. A food truck also has no worries of rising land property taxes. A successful food truck owner can earn easily over \$50,000 a year. With these average earnings the initial food truck investment is paid off in 1 year!

The key is to develop a tasty unique menu that customers can't resist!

Silver Star Metal Fabricating has been manufacturing premium quality food trucks since 1984. We are the original food truck manufacturer in the Greater Toronto Area (GTA) that has put hundreds of trucks on the roads of Ontario. Our food trucks are built with all the key elements that make a successful business. The long lasting, easy to operate, easy to clean, easy to maintain, and practical elements we put into our food trucks are like no other manufacturer.

At Silver Star Metal Fabricating we want our customers to be happy with our final product. We will not build a product unless we are satisfied of the final quality. Our reputation is just too important.

What makes our food trucks so durable?

Food trucks built at Silver Star Metal Fabricating Inc. are designed to last. We clad the walls and ceiling with quilted stainless steel which allows you to easily wipe off grease, dirt, and grime. The floors are checker plate aluminum which cleans easily with soap, a brush, and a garden hose. After years in the mobile food business we know that these interiors can get dirty and cleanup should be made easy. All the wiring is BX metal sheathed and concealed whenever possible with wall extension panels. The food equipment is mounted securely in the vehicle with heavy gauge brackets and clamps. We know that since this is a mobile product all the equipment, wiring, pipe, components, and panels

need to be firmly secured. After years of operation our food trucks show minimal signs of wear and tear.

Because we are a metal fabricator, specializing in stainless steel, we also create outside counter shelves, outside folding condiment shelves, and even clad the freezer lid with stainless steel to create more clean work space as shown in the picture above.
